

Specialized equipment and services. The petrochemical industry.

First in Scaffolds

Starting with the invention of the first steel scaffold in 1936, Safway's product base has evolved into a full range of customized scaffolding solutions.

Tight deadlines. Access challenges.
We are prepared to handle the unique situations faced by the petrochemical industry.

Experienced Labor and Services

Pre-job conferences define support capabilities, execution plans and orientation procedures to help ensure smooth work flow.

Skilled and competent crews run by experienced superintendents are available for scaffold installation and removal 24 hours a day. Crews are locally based, enabling quick response to your emergency projects.

Safway Services representatives utilize AutoCAD® software to plan and adjust scaffold designs for your project. Daily and weekly progress reports help keep your project on time and on budget.

Safety - Our #1 Objective

Safway offers one of the most advanced training programs, designed to meet OSHA's Competent Person requirement. Our national team of dedicated safety professionals helps ensure safety comes first with behavior-based processes that consistently reinforce safety.

Our risk management goal is to limit your exposure to risk through requiring ongoing training, safe work practices, and OSHA compliance.

SAFWAY®

Fast Response For On-time, On-budget Completion

Whether it's for a scheduled turnaround, emergency work or routine maintenance, count on Safway to get the job done.

Equipment needs are easily met by Safway's network of branch locations and regional distribution centers throughout North America. Ample inventory can be staged onsite in forklift racks so it's ready when you are.

Our scaffold rental inventory software program has the power to track scaffolds, labor and usage and provide you with daily and weekly reports.

Safway Scaffolding – Tailored To Fit Your Needs

Conceived by Safway, our versatile, patented Systems™ Scaffold allows connection of horizontals 360° around the post. Fast erection and dismantling can help reduce your labor costs and reduce your worker's exposure to hazards. Systems™ Scaffold also erects quickly around circular chemical and petrochemical

vessels, tanks and storage systems allowing work to progress at any level. Knee-out brackets allow the diameter of a scaffold assembly to be increased or decreased as needed.

Customized Designs For Individual Applications

With equipment designed for the petrochemical industry, Safway can meet your scaffolding needs. We have special designs to meet your individual needs from the inside of a regenerator to the top of a flare stack. Or, for truly unique situations, we'll design it to your specifications.

Safway has a long history of providing the foremost engineering assistance with one of the largest staffs of professional engineers and designers to solve your complex scaffold problems.

A full range of services is available from application design and estimating to on-site consultation.

Our Mission

To provide our customers with the highest quality, safest, and best designed products in the worker access industry.

To support our customers with expert, reliable, and cost-effective engineering, erection-dismantling services,

And to offer these products and services through a nationwide network of branches and employees.

To accomplish our mission, we commit our company and our employees to the highest standards of performance, dedication and integrity.
